## PERSONAL SKILLS

**Mother tongues** Pashto

### Other language(s)

English Professional

Swedish Very Good

Urdu Professional

Hindi Good

**Web Design** I am using HTML, CSS, and JavaScript for more than five years for Web Application. I enjoy working with Front-end because it is my favourite. For Front-end I use HTML/HTML5, CSS3/LESS/SASS, Bootstrap 3 & 4, Foundation, Materialize CSS, JavaScript, jQuery, React JS, Grunt/Gulp, Webpack, HTML5 Graphics (Canvas, SVG, Icon, Google Map) and many other Nood modules to make my job easy . I have good experience to design themes for CMS (WordPress, Drupal, and Joomla). I am very good in Adobe Photoshop CS6 and have good Typography, Print Design, Layout /Conversion Optimization and Color Theory skills.

**Web Development** In Back-End Development, PHP (Procedural and OOP), NodeJS, ExpressJS, MySQL, MongoDB, and Git are my main tools. I enjoy working with PHP because it is easy and I am using PHP from last 6 years. Why I am still attached with PHP, is because I used it for WordPress custom themes development, to fulfil my clients need. I used Slim (PHP Framework), for API development. Currently, I am learning PHP Symfony Framework to improve my skills and do some cool projects.

SEO (Search Engine Optimization)	On-Page SEO (Internal linking, Anchor text, Headlines, Titles and Meta tags, XML Sitemap, Navigation, Comments, Content, Regularity, Length, Improving click through rates, Meta description research, Authorship, Schema mark-up, Images), Off-page SEO (link building, Social media, Keyword research, Google ad words, Directories)
Social Media Management	I work as a freelance Social Media Manager, for many clients almost 3 year. I have good experience in Strategy planning, Tactics, and execution, Community management, Social web content planning, Theology and content optimization, writing skills and have the very creative mindset.
Other skills	Windows OS, Unix/Linux, Git, Rest API, Agile Methodology, Project Management.
